

DTU Environmental and Chemical Engineering Students Unite in “For a Green Son Tra” Campaign

In response to World Environment Day on June 3rd, the DTU Faculty of Environmental and Chemical Engineering and the Management Board of the Son Tra Peninsula and Tourism Beaches jointly held an event entitled “For a Green Son Tra”, aimed to raise public awareness about environmental issues.

DTU lecturers and students at the event

The management board commented that garbage and environmental pollution has become a critical problem on Son Tra due to the increasing number of recent visitors.

DTU students pick up rubbish in H? Xanh

Over the past few years, as well as holding entertainment activities, DTU has often arranged social campaigns like this one. Early in the morning, Dr. Nguyen Thi Minh Phuong, Dean of the DTU Faculty of Environmental and Chemical Engineering and many students assembled on Hoang Sa Street to clean up areas around H? Xanh, Bãi Cháy, Chùa Linh ?ng and Bãi đá Đen.

Nguyen Hoang Gia Khanh, a second-year student, said: *“The Son Tra peninsula is especially beautiful. I want to show my love for it by joining this campaign. I hope that DTU and Danang will organize more campaigns to keep Son Tra and the rest of Danang attractive, clean and green”*.

Located 13 kilometers north-east from the center of Danang, the Son Tra Peninsula nature reserve is considered to be a unique and precious treasure, with several tourist attractions. The diverse flora and fauna are a unique natural source of beauty and even oxygen for the city and must not be destroyed.
