

DTU Meets with Delegations from KIAS and INHA Universities

DTU met with delegations from the Korea Institute for Advance Study, KIAS, and with INHA University of Korea on December 27th. Attendees included Professor Jaewan Kim, Associate Professor Kisik Kim, Professor Vu Xuan Quang, Director of the DTU Center for Research and Development, and many DTU lecturers and staff.

Professor Kim addresses the meeting

The delegation spoke highly of DTU's achievements. Associate Professor Kim said: *"We are very impressed by DTU. Your campus is very attractive, modern and crowded with students who are friendly, polite and helpful. I like this place very much and hope that our meeting will open the door for partnerships with INHA and KIAS in such fields as Computational Science, Physics, Biology and so on."*

Representatives of INHA, KIAS and DTU

At the meeting, Professor Kim gave a lecture entitled: “**An Introduction to Quantum Information Science**”. This new area of study is based on the idea that information science depends on quantum physics. It includes theoretical issues in computational modeling, as well as experimental topics in quantum physics, including what can and cannot be done with quantum information. Currently theoretical Quantum Information Science is being studied in some developed countries and will increase competition in the IT sector.

Dr. Dinh Trung Hoa, from the DTU Center for Research and Development, said: “*Researching Quantum Information Science helps to accelerate the development of Information Technology and other disciplines. I hope that this meeting will open up opportunities for DTU to collaborate on research projects and to reap significant rewards this exciting, new area.*”
