

DTU Meets with the School of ICT

On December 4th, DTU met with the School of Information and Communication Technology (SoICT) of Hanoi University of Science and Technology (HUST) to discuss and expand a relationship in education and research. Attendees included Professor Huynh Quyet Thang, Dean of SoICT, Dr. Le Nguyen Bao, DTU Vice-Provost and DTU faculty and staff.

A meeting between DTU and SoICT

Professor Thang gave an overview of SoITC. As part of the Hanoi University of Science and Technology, SoITC was founded in 2009 to organize joint projects between their IT department and Japanese universities, in graduate Information and Communication Technology education. The mission of SoITC is to provide Vietnam with the best quality education, research and technological transfer and services in the field of Information and Technology Communication. Foreign and domestic companies also invest in technological development at SoITC.

Professor Huynh Quyet Thang speaks at the meeting

“We are highly impressed by DTU’s achievements, especially its successful hosting of the 22nd Informatics Olympiad and the 2013 ACM/ICPC Asia Regional Contest. DTU is well-known as a high quality private university in throughout Vietnam. You are partnering and expanding relationships several well-known IT universities in the United States and contributing to the supply of a highly-qualified local workforce.” said Professor Thang.

DTU and SoITC discussed cooperating in education and research in IT in the near future. They plan to hold seminars to share information and experience. DTU will be able to contribute scientific research theses to SoITC these lists and to be consulted, supported and trained in information technology by leading experts from SoITC.

DTU and SoITC will continue to discuss partnering to support each other in the near future.
