

## Office 365 Education Workshop

Committed to supporting Vietnamese education, Microsoft has made sustained efforts to explore effective study methods for students. Office 365 Education is specifically targeting its development as a major tool at educational institutions. On March 20th, DTU held a workshop on Office 365 Education with Mr. Nguyen Quang Trung, who is in charge of Office 365 at Microsoft Vietnam, and a large number of DTU faculty and students.

*Mr. Nguyen Quang Trung speaks at the workshop*

At the event, Mr. Nguyen Quang Trung gave participants a brief overview of the Office 365 application, in comparison to other office tools. He showed DTU students how to create a complete learning environment, how to share information, edit and archive documents, manage projects and so on. He then took questions from the audience.

*The workshop attracted many DTU students*

By using Office 365 Education in their studies, students can work with the latest technology to improve their creativity. Dinh Le Phuong Thao, a student of K19 PSU QTH2, said: *“I have my own account and have used a trial version of Office 365 Education. With this new office tool we can work more efficiently and easily exchange information with faculty and friends anytime. With its big capacity, we don’t have to worry about archiving our data and we can easily arrange documents by subject.”*

Office 365 Education is a special version targeted specifically at educational institutions, including schools. It integrates Exchange-based email, scheduling and contact management, SharePoint for intranet-based collaboration, and instant messaging and voice and video conferencing and chat using Microsoft Lync. It provides access to Microsoft Office Web Apps. Streamlined online versions of Word, Excel, PowerPoint and OneNote can be used to view, create and edit documents. Office 365 Education works with familiar Office and Windows tools and services, and across a wide range of PCs, laptops and mobile devices.
