

## **“Wacker on Wheels - Living with Construction” Workshop**

On April 24th, Wacker Chemicals Vietnam, in collaboration with the DTU Faculty of Civil Engineering, held a workshop entitled “Wacker on Wheels - Living with Construction”, at the Hoa Khanh Nam campus. The workshop provided Civil Engineering students with information on the latest international construction techniques.

*Mr. Nguyen Duc Hoang Long, in blue shirt*

Mr. Nguyen Duc Hoang, Technical Manager at Wacker Chemicals, explained how denatured Polymer plaster can be used to reduce costs and improve the quality of new building projects. Ready-made denatured Polymer plaster can also be used for making brick glue and partial cement absorbent-resistant screens.

Dr. Le Cong Duy of the DTU Faculty of Civil Engineering said: *“The workshop has provided students with information about how new materials can be used for CDIO projects. Understanding more about modern, advanced construction*

*methods and providing new alternatives will allow them to be more innovative in designing and implementing projects on graduation.”*

*Students and lecturers of DTU Faculty of Civil Engineering*

The DTU Faculty of Civil Engineering will hold more practical events like this one to keep students updated, and increase their skills and self-confidence in preparation for promising careers.
